

QUANTITATIVE & SUSTAINABLE FINANCE · ESG · MARKETS RESEARCH

Bachelor of Commerce candidate at **Waseda University** on a one-year exchange at **UC Irvine**, working at the intersection of sustainable finance, ESG, and quantitative methods, with research across climate-tech, green finance, ESG, and asset management in China, Japan, and the U.S. **CQF Candidate (2026)** · CFA Institute Certificate in ESG Investing · trilingual, with 11 published essays on climate finance and markets.

EXPERIENCE

Climate-Tech Research Intern — Venture Diligence & Investment Research

Sep 2025 – Present

Asia Climate Tech · Remote / Global

- Assess early-stage climate-tech ventures across the value chain and **seven verticals** — energy, transportation, industry, buildings, food & nature, and carbon removal — supporting investment screening and coverage decisions.
- Conduct founder and CEO diligence and synthesize findings into decision-useful research and long-form investment writing.

Research Assistant — Climate Finance & Policy

Jul – Sep 2025

GF60 / Jin Si Nan (金司南) Institute · Shanghai, China

- Contributed case analysis, writing, and visual design to the China–International Climate Philanthropy Decade Dialogue and a ten-year climate-action casebook.
- Tracked provincial implementation of China's **Document No. 136**, comparing policy interpretations and market response across regions.

ESG Management Intern

Feb 2025

Zhuhai Huafa Investment Holdings Group · Shanghai, China

- Supported the build-out of an ESG governance framework with research briefs and case studies across environmental, social, and governance factors — including how state-owned enterprises execute ESG strategy.

Project Assistant — Post-Investment & Asset Management

Mar – Apr 2024

Shanghai Zhenghai Asset Management · Shanghai, China

- Handled post-investment management as an asset manager and authored a fundraising proposal for a portfolio company.
- Mapped the company's Southeast-Asian market entry, researching demand and regulation to identify **three viable entry points**.
